MANAGEMENT REPORT

Management submits their report and the financial statements of BMW US Capital, LLC ("BMW US Capital" or "the Company") for the period ended December 31, 2023.

Principal activities

The Company was formed on January 14, 1993, and until December 31, 2000, was a wholly owned subsidiary of BMW (US) Holding Corp., which is ultimately owned by Bayerische Motoren Werke Aktiengesellschaft (BMW AG). Effective January 1, 2001, the Company adopted a legal structure permitted under the Delaware Limited Liability Company Act dated August 1, 1999, and became a limited liability company whose sole member is BMW (US) Holding Corp, which is ultimately owned by BMW AG. The conversion of the Company to a Limited Liability Company (LLC) did not have any effect on the liabilities or obligations of the organization and did not constitute dissolution of the converting entity. The Company's purpose is to assist in the financing of business activities and in managing interest and foreign exchange risk for BMW Group and its affiliates, primarily in the U.S., and to provide services in connection therewith.

The Company's activities primarily consist of providing long and short term liquidity, inter-company funding, factoring of receivables at arm's length for BMW Group companies, being the leader of the US Dollar cash pool, and operating as the in-house bank for USD, CAD and MXN for the BMW Group. The Company aims to minimize the risks from changes in interest rates and foreign exchange rates. Protection against such risks is primarily provided by hedging through financial instruments with matching maturities, amounts and other properties. Derivative financial instruments are used, such as interest rate swaps, foreign exchange swaps and forward rate agreements, to reduce the risk remaining after netting.

Business review

In a tumultuous business landscape marked by rising geopolitical tensions and economic instability, BMW Group navigated through the challenges of 2023 with resilience. Despite the environment of heightened inflation rates and escalating interest rates across various markets, the company managed to achieve a commendable performance throughout the financial year. BMW Group achieved record-breaking deliveries across its premium segment automobiles, motorcycles, and scooters. Of particular significance was the surge in sales of all-electric premium vehicles, which served as a pivotal driver for the company's growth trajectory. Despite the prevailing uncertainties, BMW Group emerged with a positive outlook, showcasing its adaptability and strategic ability in a demanding business environment.

BMW has once again claimed the top spot in the premium segment, boasting a highly attractive and innovative range of products available to customers across all brands, segments, and drivetrain technologies. Vehicles equipped with all-electric drivetrain systems stand out as the primary growth drivers. Simultaneously, the Vision Vehicles showcase how the company is positioning the NEUE KLASSE as the next innovative leap. In total, during the reporting year, the BMW Group delivered 2,554,183 automobiles across the BMW, MINI and Rolls-Royce brands, setting a new record high. In line with expectations, a solid year-on-year increase in deliveries was therefore achieved in the reporting year (2022: 2,399,632 units; +6.4%). The BMW brand set a new record with deliveries totaling 2,252,793 units (2022: 2,100,689 units; +7.2%). MINI delivered 295,358 units, similar to one year earlier (2022: 292,922 units; +0.8%). Rolls-Royce, the renowned luxury marque, delivered 6,032 units to customers, achieving a new all-time high (2022: 6,021 units; +0.2%).

19 Statements of Cash Flows

20 Notes to Financial Statements

The BMW Group's sales growth in the reporting year was significantly influenced by the systematic electrification of its product range. This was borne out by continued strong growth in deliveries of all-electric vehicles. Market demand for all-electric vehicles from the BMW, MINI and Rolls-Royce brands resulted in deliveries rising to 375,716 units (2022: 215,752 units; +74.1%). Overall, the BMW Group delivered more than half a million electrified vehicles (BEV and PHEV) to customers for the first time with a total of 565,875 units (2022: 433,792 units; +30.4%). The share of all-electric vehicles in deliveries increased to 14.7% in 2023 (2022: 9.0%; +63.3%). The significant increase also had a positive effect on the development of fleet carbon emissions.

The year 2023 was an extremely successful one for Rolls-Royce. The luxury brand delivered a total of 6,032 units to customers in the reporting year (2022: 6,021 units; +0.2%). With this performance, Rolls-Royce achieved a new record high in terms of deliveries of ultra-luxury class automobiles. Once again, the most sought-after model was the Luxury Offroader Rolls-Royce Cullinan. The Bespoke program, which allows for custom-made Rolls-Royce models tailored to individual customer preferences, also enjoyed great success worldwide. Towards the end of 2023, the first all-electric Rolls-Royce Spectre made its market debut. The luxurious Supercoupe marks a milestone in the history of the prestigious marque and already has a backlog of orders stretching through to 2025.

BMW Motorrad achieved record sales in centenary year. In 2023, BMW Motorrad celebrated its 100th anniversary and achieved a new record, with a total of 209,066 motorcycles and scooters delivered to customers (2022: 202,895 units). This represents a slight increase of 3.0%, in line expectations for the financial year.

Financial Services segment earnings down on previous year. Profit before tax reported by the Financial Services segment for the financial year 2023 amounted to €2,962 million (2022: €3,205 million; –7.6%) and was therefore moderately down on the previous year. Key reasons for the decrease were higher refinancing costs due to rising interest rates and a decrease in the

contract portfolio. Remarketing revenues from lease returns remained at a high level, but were nevertheless below the previous year's figure. This also had a negative impact on earnings compared to the previous year. On the other hand, a lower expense for credit risk provisioning had a positive effect on earnings. In the previous year, the level of expense recognized in connection with credit risk provisioning was heavily influenced by geopolitical uncertainties and a weaker macroeconomic outlook. The credit loss ratio for the entire credit portfolio remained at a low level in 2023, finishing at 0.18% for the year (2022: 0.13%). In balance sheet terms, business volume increased slightly to stand at €137,910 million (2022: €135,689 million; +1.6%).

Group revenues totaled €155,498 million in the reporting year (2022: €142,610 million), representing a solid increase over the previous year (+9.0%). The main reason for revenue growth was the higher number of vehicles delivered. Furthermore, favorable product mix effects and the full consolidation of BMW Brilliance contributed to the year-on-year increase in revenues. Additionally, higher interest rates and income from dealership financing further increased revenues in 2023, mainly reflecting the impact of higher inventory levels held by dealerships in light of improved vehicle availability, model changes and a higher average financing volume per vehicle. Accordingly, Group profit before tax amounting to €17,096 million – as forecast – was significantly lower than one year earlier (2022: €23,509 million).

In highlighting BMW US Capital, it is important to highlight that the net result arises predominantly from the net interest margin between funding provided to affiliates and the cost of funds from the Company's borrowings. Additionally, gains or losses from financial instruments' fair value also play a notable role. BMW US Capital, in October 2020 updated its business model and implemented a liquidity fee to be received from BMW AG. The Company reported an income before taxation of \$30.6 million, marking a decline of \$28.7 million compared to the figure of \$59.4 million recorded as of December 31, 2022. This decrease primarily stems from diminished gains realized from fair value outcomes.

8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

The Company applies IFRS 9 for the valuation of its financial instruments. IFRS 9 requires that all derivative instruments be recorded on the statements of financial position at their respective fair values upon initial recognition. Fair value changes are reflected in the statements of comprehensive income / (loss). Further details can be found in the appropriate footnotes throughout the report.

The progress of the Company is monitored by financial and non-financial data on a regular basis with emphasis on key performance indicators, including net interest margin, and loan outstanding at the reporting date. These key performance indicators are reviewed and adjusted regularly and in line with the requirements of the business.

Outlook

The outlook of the BMW Group presented in this report reflect the expected development in 2024 from the perspective of Group management. However, it is important to note that unforeseen events or circumstances could impact the actual outcomes and cause them to deviate from the expected development.

The International Monetary Fund anticipates global growth of 3.1% in 2024. Geopolitical conflicts and the effects of tighter monetary policy in many countries will be the greatest burdens on the global economy in 2024. Higher interest rates are affecting consumer spending and investment, with a corresponding effect on the economy.

Forecasts for the eurozone as a whole indicate slight growth (+0.6%). France (+0.7%), Italy (+0.5%) and Spain (+1.6%) are expected to meet or outstrip the average for the eurozone. Germany is expected to record at least a slight increase in economic output in 2024 (+0.3%), although the continued modest growth in the global economy is dampening the country's export economy.

A slight uptick in economic output (+0.4%) is forecast for the UK, where higher interest rates and continued higher inflation are slowing growth.

The growth rate in the USA is expected to slow to 1.8% in 2024. Higher interest rates are burdening companies and private households in that country as well, while continually low unemployment levels are supporting the economy.

Growth is expected to reach 4.6% in China, where continued upheaval in the real estate sector and the resulting drop in consumer confidence are dampening expectations.

The Japanese economy is expected to see slower growth in 2024 than in the previous year (+0.8%).

Currency markets and international interest rate environment

Currencies of particular importance for the international operations of the BMW Group are the Chinese renminbi, the British pound, the US dollar, the Japanese yen and the South Korean won.

It is expected that inflation in the US and in Europe will continue to fall, and the BMW Group therefore does not expect any further interest rate hikes from central banks. Accordingly, the US dollar is expected to move sideways against the euro in 2024, with the pound/euro exchange rate also expected to remain stable.

It is possible that Japan's highly expansionary monetary policy may come to an end in 2024. If it does, the yen would appreciate somewhat against the euro compared to its current very low level.

Low inflation in China could lead to a more expansionary monetary policy on the part of the central bank of China, potentially resulting in a depreciation of the renminbi against the euro.

8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

The currencies of emerging countries such as India and Brazil may benefit from the monetary policies of the EU and USA stabilizing in 2024. No further devaluations against the euro and US dollar are therefore expected at present.

International automobile markets

The generally stable macroeconomic conditions should allow for slight growth on international automobile markets in 2024 (+3.9%). Growth is expected to be spread across many markets, particularly the US and China. A higher global supply of new vehicles is, however, expected to give rise to increasing price competition, which will also have an effect on prices for preowned vehicles.

International motorcycle markets

The BMW Group expects the world's motorcycle markets in the 500 cc plus class to remain in line with the previous year overall in 2024. In Europe, market growth is also expected to be in line with last year's level, with a slight decrease forecast in the USA. Economic expectations will influence the motorcycle market in China, while the motorcycle market in Brazil is expected to remain in a stable condition in 2024, as in the previous year.

Expected consequences for the BMW Group

Future developments on international automobile markets have a direct impact on the BMW Group. A challenging competitive environment and macroeconomic and geopolitical developments could all have a significant impact on business performance. The close cooperation between our sales network and our production network and our flexible vehicle architecture allow us to respond to even unforeseeable developments effectively.

Internal Control over Financial Reporting

The Company actively participates in the internal control system in place throughout the BMW Group aimed at ensuring the effectiveness of operations. It adheres to the principal features of the internal control system, in relation to the Company and its financial reporting processes. A detailed description and explanation of the internal control system is available within the BMW Group Annual Report for the year 2023.

Management assesses the design and effectiveness of the internal control over financial reporting on the basis of internal review procedures performed at regular intervals. Effective measures are implemented whenever weaknesses are identified and reported. Based on these assessments, management believes that the Company maintained effective internal controls over financial reporting during the period ended December 31, 2023.

Principal risks and uncertainties

The management of the business and the execution of the Company's strategy are subject to a number of risks. Detailed descriptions of the main risks facing the Company and the instruments used to manage these risks are presented in the notes to the financial statements.

Research and development

The Company does not carry out any research and development.

Creditor payment policy

The Company's policy concerning the payment of its trade creditors is to pay in accordance with contractual and other legal obligations.

RESPONSIBILITY STATEMENT

Statement of Management responsibilities in respect of financial statements and the Management Report

Management is responsible for preparing the financial statements and the Management Report in accordance with applicable laws and regulations of Luxembourg, which BMW US Capital, LLC has chosen as its Home Member State under the regulations of the EU Transparency Directive.

Luxembourg Law, pursuant to the EU Transparency Directive, requires Management to prepare audited financial statements for each financial year. Management has elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standard Board. Management makes every effort to ensure the financial statements present fairly the financial position of the Company and the performance for that period.

Management is also responsible for preparing the Management Report that complies with the law.

The financial information contained in the Management Report concerning the operations, economic performance and financial condition of the Company is subject to known and unknown risks, uncertainties and contingencies, many of which are beyond the control of the Management of the Company, which may cause actual results, performance or achievements to differ materially from anticipated results, performance or achievements.

Also, the financial information is based upon Management's estimates of fair values and future costs, using currently available information. Factors that could cause such differences include, but are not limited to:

- risks of economic slowdown, downturn or recession,
- risks inherent in changes in market interest rates and spreads,
- lending conditions to companies turning to the worse, thereby increasing the cost of borrowing,
- changes in funding markets, including commercial paper and term debt,
- uncertainties associated with risk management, including credit, prepayment, asset/liability, interest rate and currency risks,
- changes in laws or regulations governing BMW US Capital, LLC's business and operations, and
- changes in competitive factors.

Management has a general responsibility to design and implement controls to prevent and detect fraud and other irregularities.

INDEPENDENT AUDITOR'S REPORT

To Bayerische Motoren Werke Aktiengesellschaft, Munich

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the financial statements of BMW US Capital, LLC, Woodcliff Lake, New Jersey, which comprise the statement of financial position as at December 31, 2023, and the statement of comprehensive income / (loss), the statement of changes in member's capital and the statement of cash flows for the year then ended, and notes to the financial statements, comprising material accounting policy information and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at December 31, 2023, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Germany, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the

audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the financial year of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In our view, the matter of most significance in our audit was as follows:

1 Accounting treatment of hedging relationships

Our presentation of this key audit matter has been structured as follows:

- 1 Matter and issue
- 2 Audit approach and findings
- 3 Reference to further information

Hereinafter we present the key audit matter:

1 Accounting treatment of hedging relationships

- 1 The company uses derivative financial instruments to hedge in particular interest rate risks in combination with foreign exchange rate risks arising from its ordinary business activities. The management's hedging policy is documented in internal guidelines and serves as the basis for

3	Management Report
8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

these transactions. The company enters into interest rate derivatives for the purpose of achieving a desired ratio of fixed to variable interest rate exposures. Interest rate risk is mitigated by concluding interest rate swaps and cross-currency interest rate swaps. In addition, FX forwards are used for the hedging of pure foreign currency risk.

Derivatives are measured at fair value with changes in fair value recognized in profit or loss. The sum of all derivatives with positive fair values amounts to \$295 million as of the reporting date, while the sum of all derivatives with negative fair values amounts to \$1,024 million. Hedges of the exposure to changes in fair value of recognized assets and liabilities that are attributable to interest rate risk are designated as fair value hedge relationships, if hedge accounting requirements pursuant to IFRS 9 are met. When applying fair value hedge accounting the cross-currency basis spread is not designated as part of the hedge relationship. At the reporting date, the company held derivatives designated as hedging instruments with positive fair values amounting to \$205 million and negative fair values amounting to \$922 million.

The effective portion of the cumulative gain or loss from measuring the derivative hedging instruments at fair value is recognized in financial result (profit or loss). The cumulative gain or loss of the hedged item attributable to the hedged risk is recognized as hedged fair value in financial result. Changes in the fair value of the hedging instruments caused by changes in the cross-currency basis spread are not designated in the hedge relationship, instead these fair value changes are recognized in other comprehensive income and are accumulated in the "cost of hedging reserve". The accumulated changes due to the cross-currency basis spread are reclassified from other comprehensive income to profit or loss in the periods during which the hedged cash flows of the hedged items affect profit or loss. Insofar the reclassification of accumulated changes due to cross-currency basis spreads takes place over the duration of the hedging relationship.

As of the balance sheet date, a cumulative amount of \$601 million (before deferred taxes) was recognized as hedge fair value adjustment of designated hedged items. In the cost of hedging reserve, a cumulative amount of \$0.7 million was recognized (including deferred taxes).

From our point of view these matters were of particular significance for our audit due to the high nominal amounts of hedged items as well as the extensive accounting and disclosure requirements of IFRS 9 and IFRS 7.

- 2 As part of our audit and with the assistance of our internal specialists, we assessed, among other things, the contractual and financial parameters and evaluated the accounting treatment, including the effects on profit or loss and equity, of the various hedge relationships.

Together with our specialists, we also evaluated the company's internal control system regarding derivative financial instruments, including the internal activities to record and maintain data in the treasury management system. In addition to evaluating the internal control system, we obtained trade confirmations for the hedging instruments in order to assess completeness. With regards to the assessment of the ineffectiveness of designated hedge relationships, we obtained and evaluated the quantitative assessment conducted by management. In doing so, we were able to satisfy ourselves that the requirements for applying fair value hedge accounting according to IFRS 9 were substantiated and sufficiently documented.

- 3 The company's disclosures on hedge accounting are contained in sections entitled "Basis of Preparation and Significant Accounting Policies and Practices" and "Risk Management" in the notes to the financial statements.

Other information

Management is responsible for the other information. The other information comprises the annual report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether

due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our

3	Management Report

19	Statements of Cash Flows
20	Notes to Financial Statements

opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Report on the Assurance on the Electronic Rendering of the Financial Statements Prepared for Publication Purposes

Assurance Opinion

We have performed assurance work to obtain reasonable assurance as to whether the rendering of the financial statements (hereinafter the "ESEF documents") contained in the electronic file BMW_US_Capital_Annual_Report_ESEF-2023-12-31.zip and prepared for publication purposes complies in all material respects with the requirements of the Delegated Regulation (EU) 2019/815 ("ESEF format"). This assurance work extends only to the conversion of the information contained in the financial statements into the ESEF format and therefore relates neither to the information contained within these renderings nor to any other information contained in the electronic file identified above.

In our opinion, the rendering of the financial statements contained in the electronic file identified above and prepared for publication purposes complies in all material respects with the requirements of the Delegated Regulation (EU) 2019/815 for the electronic reporting format. Beyond this assurance opinion and our audit opinion on the accompanying financial statements for the financial year from January 1 to December 31, 2023 contained in the "Report on the Audit of the Financial Statements" above, we do not express any assurance opinion on the information contained within these renderings or on the other information contained in the electronic file identified above.

3	Management Report
8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

Basis for the Assurance Opinion

We conducted our assurance work on the rendering of the financial statements contained in the electronic file identified above in accordance with the International Standard on Assurance Engagements 3000 (Revised). Our responsibility in accordance therewith is further described in the "Auditor's Responsibilities for the Assurance Work on the ESEF Documents" section. Our audit firm applies the International Standard on Quality Management 1.

Responsibilities of the Management for the ESEF Documents

The management of the Company is responsible for the preparation of the ESEF documents including the electronic renderings of the financial statements in accordance with the Delegated Regulation (EU) 2019/815.

In addition, the management of the Company is responsible for such internal control as management has considered necessary to enable the preparation of ESEF documents that are free from material non-compliance with the requirements of the Delegated Regulation (EU) 2019/815 for the electronic reporting format, whether due to fraud or error.

Auditor's Responsibilities for the Assurance Work on the ESEF Documents

Our objective is to obtain reasonable assurance about whether the ESEF documents are free from material non-compliance with the requirements of the Delegated Regulation (EU) 2019/815, whether due to fraud or error. We exercise professional judgment and maintain professional skepticism throughout the assurance work. We also:

- Identify and assess the risks of material non-compliance with the requirements of the Delegated Regulation (EU) 2019/815, whether due to fraud or error, design and perform assurance procedures responsive to those risks, and obtain assurance evidence that is sufficient and appropriate to provide a basis for our assurance opinion.
- Obtain an understanding of internal control relevant to the assurance work on the ESEF documents in order to design assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing an assurance opinion on the effectiveness of these controls.

- Evaluate the technical validity of the ESEF documents, i.e., whether the electronic file containing the ESEF documents meets the requirements of the Delegated Regulation (EU) 2019/815 in the version in force at the date of the financial statements on the technical specification for this electronic file.
- Evaluate whether the ESEF documents provide an XHTML rendering with content equivalent to the audited financial statements.

REFERENCE TO AN OTHER MATTER – USE OF THE AUDITOR'S REPORT

Our auditor's report must always be read together with the audited financial statements as well as the assured ESEF documents. The financial statements converted to the ESEF format – including the versions to be published to the operator of the Luxembourg Stock Exchange – are merely electronic renderings of the audited financial statements and do not take their place. In particular, the "Report on the Assurance on the Electronic Rendering of the Financial Statements Prepared for Publication Purposes" and our assurance opinion contained therein are to be used solely together with the assured ESEF documents made available in electronic form.

NOTES TO FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2023 AND 2022

1 Nature of Operations

BMW US Capital, LLC (the Company) was formed on January 14, 1993, and until December 31, 2000, was a wholly owned subsidiary of BMW (US) Holding Corp., which is ultimately owned by BMW AG (Bayerische Motoren Werke Aktiengesellschaft).

Effective January 1, 2001, the Company adopted a legal structure permitted under the Delaware Limited Liability Company Act dated August 1, 1999, and became a limited liability company whose sole member is BMW (US) Holding Corp., which is ultimately owned by BMW AG. The conversion of the Company to a Limited Liability Company (LLC) did not have any effect on the liabilities or obligations of the organization and did not constitute dissolution of the converting entity. As a result of the conversion, the stockholder's equity of BMW US Capital Corp. was contributed to the Company and is now accounted for as member's capital.

The Company's purpose is to assist, via long and short term advances, the financing of the activities and managing interest and foreign exchange risks for BMW AG or the Parent and its affiliates (BMW Group), primarily in the United States, and to provide services in connection therewith.

The Company's U.S. affiliates operate primarily in the automotive industry and generate revenues across North America, with a concentration in states with large populations such as California, Texas, Florida, New York, and New Jersey.

The Company's business as a service provider is connected to the automotive and financial activities of BMW Group with respect to yearly fluctuations due to overall economic changes and their impact over BMW Group's businesses.

The Company's revenues and expenses arise primarily from interests on deposits and borrowings and fair value gains and losses on financial instruments, which include derivatives executed for hedging purposes.

The debts, obligations, and liabilities of the Company, whether arising in contract, tort, or otherwise, shall be solely the debts, obligations, and liabilities of the Company, and no member, manager, and/or officer of the Company shall be obligated personally for any such debt, obligation, or liability of the Company solely by reason of being a member, manager and/or officer.

2 Basis of Preparation and Significant Accounting Policies and Practices

(a) Statement of Compliance

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

All Interpretations issued by the IFRS Interpretations Committee which are mandatory at December 31, 2023 have been applied.

Other financial reporting standards issued by the IASB and not yet applied are not expected to have any significant impact on the Company Financial Statements.

The financial statements were authorized for issuance by management of the Company on April 26, 2024.

10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

(b) Basis of Measurement

The financial statements have been prepared on the historical cost/accrual basis except for the following material items in the financial statements of position:

- Derivative financial instrument, and
- Recognized financial assets and liabilities that are part of fair value hedge relationships are measured at fair value in respect of the risk being hedged in accordance with IFRS 9.

(c) Use of Estimates in Financial Statement Preparation

The preparation of financial statements in conformity with IAS 1, Presentation of Financial Statements, requires management to estimate the effects of uncertain future events on assets and liabilities at the statement of financial position date in order to determine the carrying amounts of those assets and liabilities.

Revisions to accounting estimates are recognized in the period in which the estimates are revised and in future periods affected. Due to the current financial market conditions, the estimates contained in these financial statements concerning the operations, economic performance, and financial condition of the Company are subject to known and unknown risks, uncertainties and contingencies many of which are beyond the control of Company management, which may cause actual results, performance or achievements to differ materially from anticipated results, performance, or achievements. Also, the estimates are based upon management's estimates of fair values, using currently available information. Factors that could cause differences include, but are not limited to the following:

- risks of economic slowdown, downturn or recession
- risks inherent in changes in market interest rates and credit especially in an environment of unpredictable financial market conditions

- lending conditions to companies turning to the worse, thereby increasing the cost of borrowing
- changes in funding markets, including commercial paper and term debt
- uncertainties associated with risk management, including credit, prepayment, asset/liability, interest rate and currency risks
- changes in laws or regulations governing our business and operations
- changes in competitive factors

For the valuation of financial instruments, the most significant assumptions and estimates relate to the interest rates and expected cash flows used in the valuation models.

(d) Functional and Presentation Currency

These financial statements are presented in United States dollars (USD), which is the functional currency of the Company. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

(e) Foreign Currency Transactions

Transactions in foreign currencies are translated into the functional currency using spot exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency using the spot exchange rate at that date. The economic effect of foreign currency transactions is recognized in the statements of comprehensive income / (loss).

(f) Financial Instruments

Financial instruments are contracts that give rise to a financial asset of one company and a financial liability or an equity instrument of another. Financial instruments are recognized when the Company becomes party to the contractual provisions of the instrument. Regular way purchases or sales of financial assets are recognized at the settlement date.

3	Management Report
8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

Derivative financial instruments of the Company are subject to legally enforceable master netting agreements or similar contracts. However, receivables and payables relating to derivative financial instruments are not netted due to non-fulfilment of the stipulated criteria. Offsetting would have the impact on the carrying amounts of derivatives shown in the additional disclosures to financial instruments.

Non-derivative financial assets and liabilities are only offset if a legally enforceable right currently exists and it is actually intended to offset the relevant amounts. No financial assets and liabilities have been netted in the Company due to the fact that the necessary requirements for netting have not been met.

Non-Derivative Financial Instruments

Regular way purchases or sales of non-derivative financial instruments are recognized at the settlement date.

Financial assets that represent debt instruments according to IAS 32 are classified either as

- financial assets measured at amortized cost (AC); or
- financial assets measured at fair value through profit or loss (FVPL).

The measurement category AC is applicable to financial assets (debt instruments) that meet the following requirements:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise to cash flows on specified dates that are solely payments of principal and interest on the principal amount outstanding.

Financial assets (debt instruments) not meeting the conditions mentioned above are classified and measured at fair value through profit or loss. The measurement categories "fair value through other comprehensive income with recycling" (in regard to debt instruments under IAS 32) and "fair value through other comprehensive income without recycling" (regarding equity instruments under IAS 32) are not applicable for the Company.

The Company's non-derivative financial assets include receivables from BMW Group companies as well as cash and cash equivalents and are classified as financial assets measured at amortized cost.

All highly liquid investments with an original maturity of three months or less are considered as cash and cash equivalents. Cash and cash equivalents consist primarily of short term deposits with original maturities of three months or less from inception. For cash and cash equivalents, the carrying amount approximates the respective fair value due to its short maturity.

Non-derivative financial liabilities are classified into the following measurement categories:

- financial liabilities at fair value through profit or loss (FVPL); or
- financial liabilities measured at amortized cost (AC).

Non-derivative financial liabilities mainly include term debt, commercial paper and liabilities due to BMW Group companies and are classified as AC. The company does not apply the fair value option for financial assets or financial liabilities.

Financial instruments belonging to the measurement category FVPL are recognized at their fair value. Resulting transaction costs are immediately recorded in profit or loss.

3	Management Report
8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

Non-derivative financial assets and liabilities measured at amortized cost are initially recognized at fair value under consideration of directly attributable transactions costs. On initial measurement, fair value generally corresponds to the transaction price, i. e. the consideration given or received. Subsequently, non-derivative financial assets and liabilities are measured at amortized cost using the effective interest rate method.

Financial assets are derecognized when the rights to receive contractual cashflows have expired or been transferred and the Company has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when the contractual obligations have expired or otherwise terminated.

According to IFRS 9, the Company recognizes expected credit losses (ECL), for receivables from BMW Group companies as well as cash and cash equivalents measured at amortized cost. The receivables are aggregated to determine expected credit losses based on similar risk characteristics.

The general approach according to IFRS 9 outlines a three-stage model to determine the amount of ECL. At initial recognition loss allowances are recognized at an amount equal to 12-month ECL (stage 1). In case of significant increases in the credit risk since initial recognition, loss allowances are determined as lifetime ECL (stage 2).

The assessment of whether lifetime ECL should be recognized is based on significant increases in the likelihood or risk of a default occurring since initial recognition. If the internal risk management and control systems do not indicate a significant increase in credit risk any earlier, the rebuttable presumption is that a significant increase in credit risk has occurred when payments are more than 30 days overdue. The Company considers the probability of defaults and continually monitors the development of the credit risk in each reporting period, considering all reasonable and supportable information and forecasts. This includes especially historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date.

Receivables are credit-impaired when one or more events have occurred that have a detrimental impact on the estimated future cash flow (stage 3). Such events comprise situations of delayed payment over a certain period, the institution of enforcement measures, the threat of insolvency or over-indebtedness, the application bankruptcy proceedings, or the failure of reorganization measures.

A default of a financial asset is assumed, if bankruptcy proceedings have been opened or if there is a high probability that no reasonable expectation of repayment exists. In case of default, the financial assets are derecognized. When derecognizing financial assets, the Company continues to undertake enforcement measures to attempt to collect the receivables due.

The simplified approach is not applicable at the Company.

Derivative Financial Instruments

Derivative financial instruments are used for hedging purposes in order to reduce the currency and interest rate risks from operating activities and related financing requirements as well as to support the overall value at risk approach applied by BMW AG.

All derivative financial instruments (such as interest, currency, and combined interest / currency swaps as well as forward currency contracts and options) are measured initially and subsequently at their fair value in the statement of comprehensive income in the financial result (FVPL). They are generally recognized at the trade date.

The fair values of derivative financial instruments are measured using market information prevailing at the end of the reporting period and recognized valuation techniques. They correspond to the prices that would be received for the sale of an asset or paid for the transfer of a liability between market participants in an arm's length transactions.

Additional information is discussed in [note 5](#).

3	Management Report
8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

Application of Hedge Accounting

Hedge accounting is applied if all requirements according to IFRS 9 are met. On the date the derivative contract is entered, the Company designates the derivative as a hedging instrument. The hedging instrument used, and the hedged items are affected by the same risk. In each hedging relationship for which hedge accounting is used, the designated amount of the hedged item corresponds to the volume of the hedging instrument. The resulting economic relationship between the hedging instrument and hedged item is not dominated by the effect of the credit risk. The Company formally documents details of the respective economic relationships between hedging instruments and hedged items, including its risk management objective and strategy for undertaking various hedge transactions, together with the method that will be used to assess the effectiveness of the hedging relationship.

The Company especially enters into interest rate derivative agreements as part of its overall interest rate risk management program and applies fair value hedge accounting. These transactions are entered as hedges against the effects of future interest rate fluctuations on term debt issued by the Company or financial receivables and liabilities due to BMW Group companies. The cumulative gain or loss from measuring the derivative hedging instrument at fair value is recognized in profit or loss. The cumulative gain or loss of the hedged item attributable to the hedged risk is recognized as basis adjustment in the profit or loss immediately. Accordingly, the change in fair values attributable to the hedged risk of both, the derivative and the underlying hedged item, are offset in the financial result, so long as a highly effective relationship is maintained between the derivative instruments and the corresponding position being hedged. The Company has exercised the option of designating cross-currency basis spreads as cost of hedging rather than as part of the hedging relationship and presenting them separately in equity (Cost of Hedging).

The Company discontinues hedge accounting when it is determined that the hedge relationship ceases to meet the qualifying criteria, including instances when the derivative expires or is sold, terminated, or exercised, the forecasted transaction is no longer highly probable, or management changes its risk management objective.

Where hedge accounting is applied, changes in fair value are presented as part of other financial result in the income statement or within other comprehensive income as a component of accumulated other equity (Cost of Hedging).

Additional information regarding the Company's objectives and strategies regarding the management of foreign currency and interest rate risk, including the use of derivative instruments, is discussed in notes [73\(f\)](#) and [7\(c\)](#).

(g) Recognition of Interest Income and Expenses

Interest income or expense is recognized using the effective interest method. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortized cost of the financial liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortized cost of the credit impaired financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

(h) Income Taxes

BMW US Capital, LLC is a member of the US Tax Group under BMW (US) Holding Corp. for federal as well as state tax purposes and therefore does not have a separate tax obligation. BMW (US) Holding Corp. has an internal tax sharing arrangement whereby the Company settles its separate company tax receivables or liabilities annually with BMW (US) Holding Corp. As a single member limited liability company, the Company is treated as a division of BMW (US) Holding Corp., which files a consolidated federal, state, and local income tax return.

Income taxes are determined on a separate company basis and allocated to each company based upon the BMW (US) Holding Corp.'s internal tax sharing arrangement. Deferred tax assets and liabilities are determined based on the differences between the carrying amount of assets and liabilities for financial reporting purposes and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

3	Management Report
8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

As a subsidiary of BMW AG, BMW US Capital LLC, a legal entity in the U.S., falls within the scope of the Minimum Tax Act to ensure a minimum global tax of 15%. According to this, BMW AG must pay additional tax to the extent that the specific tax rate under the Minimum Tax Act falls below the minimum rate of 15% per jurisdiction if no recognized additional tax is levied in the respective jurisdiction. Currently, there is no similar tax regime in the U.S. The Minimum Tax Act applies to financial years beginning after December 31, 2023. In fiscal year 2023, BMW AG is not subject to any tax burden under the Minimum Tax Act. BMW AG is currently in the process of assessing the effects from fiscal year 2024. For this purpose, BMW AG analyzed the jurisdictions that could be affected by an additional tax based on a preliminary minimum tax calculation, considering the statutory temporary simplification regulations (Transitional Safe Harbour). In principle, BMW US Capital LLC will not be subject to any additional tax burden from the national supplementary tax in the future, as BMW AG owes the additional tax in accordance with the Minimum Tax Act.

(i) Provisions for Pension and Similar Obligations

The Company's net obligation for defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method in accordance with IAS 19, Employee Benefits. When the calculation results in the potential asset for the company, the recognized asset is limited to the present value of economic benefit available in the form of any future refund from the plan or reduction in the future contribution to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurement of the net pension liability, which comprises actuarial gains and losses, the return on plan assets (excluding interest), are recognized immediately in OCI. The company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning annual period to the net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during

the period as a result of contributions and benefit payments. Net interest expense and other expenses related to the defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or a plan is curtailed, the resulting change in benefit that relates to the past service or the gain or loss on curtailments is recognized in profit or loss. The Company recognizes the gains and losses on the settlement of the defined benefit plan when the settlement occurs.

3 Notes on the Items of the Balance Sheet

(a) Receivables from BMW Group companies, Liabilities to BMW Group companies

The Company makes and accepts loans to / from various BMW Group companies in the course of normal business operations. Receivables from BMW Group companies due within 12 months and the related accrued interest receivable from BMW Group companies are short term in nature. The fair value of long-term amounts receivable from BMW Group companies is the estimated discounted future cash flows based on rates currently available for debt with similar terms and remaining maturities. The Company serves as the In-house bank service provider for the Americas region and is the cash pool leader for USD, CAD and MXN currencies. The Company receives deposits from and / or lends funds to participating entities of the BMW Group. Balances from participating entities are not subject to offsetting.

In accordance with IFRS 9, the Company has adjusted the carrying value of receivables subject to fair value hedges by the change in fair value to the risk being hedged as of December 31, 2023 and December 31, 2022. At December 31, 2023, the resulting adjustment decreased the related value of the underlying receivable by \$132,263k. At December 31, 2022, the resulting adjustment decreased the related value of the underlying receivable by \$533,987k. Concurrently with this adjustment, the derivative instruments classified as fair value hedges were carried at fair value with changes in fair value recorded in profit or loss.

(b) Other Liabilities

Other liabilities include mainly trade payables and period end accruals.

(c) Pension and Similar Obligations

The Company participates in the Pension, Post-Retirement Medical, and Life Insurance Plans of BMW (US) Holding Corp. and its affiliates. The Post-Retirement Medical and Life Insurance Plans are group plans for retired employees with the appropriate age and years of service. Components of the plan include an annual deductible, employee coinsurance, out of pocket limit, no lifetime maximum benefit, and prescription drug coverage. The Pension Plan and Post-Retirement Medical Plan are defined benefit plans.

The defined benefit obligation is calculated using the projected unit credit method. The actuarial computation requires the use of estimates and assumption, including discount rate and mortality. Actuarial gains and losses arising from defined benefit plans are recorded directly in other comprehensive income. Interest expense on the net defined benefit liability is presented within net interest margin on the Statements of Comprehensive Income / (loss). All other components of pension expense are presented in the comprehensive income / (loss) statements under general and administrative expenses.

The Plan was closed to new participants on March 1, 2012. Employees hired after March 1, 2012, are not eligible for the Plan. Eligibility for unreduced retirement benefits begins at age 60, provided that the participant has at least five-years of service. Reduced retirement benefits can commence prior to age 60 with a least 5 years of service. An early retirement subsidy is provided at retirement after age 55 with at least 10 years of service.

As of June 30, 2019, the Company has frozen the pension plan. The Post-Retirement Medical and Life Insurance plans were not affected by the pension plan decision. The defined benefit to employees will be based on amounts contributed by the Company up to this date.

(d) Commercial Paper

The Company maintains a BMW AG guaranteed U.S. commercial paper program of \$7 billion. The following details apply to commercial paper at December 31, 2023:

2023 in thousands of dollars	Outstanding	Weighted average maturity period (in days)	Weighted average nominal interest rate (in %)
	2,205,545	14	5.36

Commercial paper is an unsecured and discounted promissory note issued to finance the short term credit needs of institutions. Although commercial paper is occasionally issued as an interest bearing note, it typically trades at a discount to its par value. In other words, the purchaser usually purchases commercial paper below par and then receives its face value at maturity. The discount, or the difference between the purchase price and the face value of the note, is amortized over the term of the commercial paper as interest expense by applying the effective interest rate method. At December 31, 2023 and December 31, 2022, the commercial paper unamortized discount was \$4,455k and \$275k, respectively.

At December 31, 2023 and December 31, 2022, the fair value of the Company's commercial paper obligations approximated the recorded value primarily due to the short-term nature of the outstanding commercial paper.

(e) Term Debt and Line of Credit

Term debt consists of the following at December 31, 2023:

Interest	Currency	Issue volume in thousands in relevant currency	Weighted average maturity period (in years)	Weighted average nominal interest rate (in %)
Variable	USD	2,550,000	2.9	2.8
Fixed	USD	14,795,000	7.1	3.4
Fixed	EUR	500,000	12.0	1.0

The carrying amounts of term debt due in the following five fiscal years, and thereafter, are as follows as of December 31, 2023 and December 31, 2022:

	2023	2022
in thousands of dollars	Carrying amounts	Carrying amounts
Maturity:		
Due within one year	4,283,841	3,348,179
Due between one and five years	9,589,283	9,710,837
Due later than five years	3,431,779	3,932,801
Total	17,304,903	16,991,817

The movements in term debt are as follows for the years ended December 31, 2023 and 2022:

in thousands of dollars	
Balance as of December 31, 2022	16,991,817
Issues	3,118,625
Repayments	(3,242,408)
Accrued interest payable	34,200
Change in fees amortized by the effective interest method	(2,668)
Fair value change due to hedge accounting	405,337
Balance as of December 31, 2023	17,304,903

in thousands of dollars	
Balance as of December 31, 2021	19,557,530
Issues	1,997,546
Repayments	(3,131,367)
Accrued interest payable	12,672
Change in fees amortized by the effective interest method	1,438
Fair value change due to hedge accounting	(1,446,002)
Balance as of December 31, 2022	16,991,817

Term Debt by Category:

in thousands of dollars	2023	2022
Debt part of a fair value hedge relationship	14,581,135	14,902,833
Debt at amortized cost	2,723,768	2,088,984
Total	17,304,903	16,991,817

In accordance with IFRS 9, the Company has adjusted the carrying value of term debt subject to fair value hedges by the change in fair value to the risk being hedged as of December 31, 2023 and December 31, 2022. At December 31, 2023 and December 31, 2022, the resulting adjustment increased the related value of the underlying debt by \$732,941k and \$1,118,563k respectively. Concurrently with this adjustment, the derivative instruments classified as fair value hedges were carried at fair value with changes in fair value recorded through earnings.

At December 31, 2023 and December 31, 2022, \$17,304,903k and \$16,991,817k respectively, of the unsecured debt is guaranteed by BMW AG. The Company has access to a syndicated credit line, which underwent renewal in June 2023. This credit line, totaling €8 billion, remains accessible until June 2028 without the need to exercise extension options. It is facilitated by a consortium consisting of 43 international banks. As of December 31, 2023, no funds had been drawn from this credit facility.

Bond discount and private placement fees incurred related to the issuance of term debt are taken into account when initially recording the term debt

and are recognized in the statements of comprehensive income / (loss) as interest expense under the effective interest rate method over the remaining lives of the debt. Bond discount is the difference between the face value and the proceeds received when the term debt is issued below face value. Private placement fees relate to legal and administrative fees associated with the issuance of the term debt.

(f) Derivative Financial Assets and Liabilities

The Company enters into payer interest rate swaps, combined interest / currency swaps and option agreements with both BMW Group companies and external parties to manage and hedge its interest rate exposure arising from mismatches between the interest earned on non-derivative financial assets and the interest paid on non-derivative financial liabilities. Floating rates are fixed periodically and, during this transition period for the respective benchmark rates, are mostly based on USD London Interbank Offered Rate (LIBOR) as published daily by the British Bankers' Association or USD secured overnight financing rate (SOFR) as published by The New York Federal Reserve. Depending on the respective hedge relationship interest rate swaps and combined interest / currency swaps are accounted for as designated hedging instruments applying hedge accounting as well as stand-alone financial derivatives categorized as FVPL.

In addition, foreign exchange forward and swap agreements are concluded with affiliates and external parties to hedge foreign exchange rate risk. In general, the Company concludes foreign exchange derivatives with external parties and simultaneously enters into reciprocal contracts with its affiliates in order to manage currency risk on the level of the affiliates.

Total	24,219,853	1,023,701	21,328,951	1,274,844

Additional information is provided in note 7(c).

4 Notes on the Items of the Comprehensive Income Statement

(a) Interest income and expense

Interest income with BMW Group Companies relates to loans to affiliates, derivatives and factoring of short-term BMW AG trade receivables. The factored receivable is accounted for at amortized cost. The company earns a premium which is the difference between the present value and face value of the receivable factored and is earned as the receivable comes due (terms 30–90 days). Interest expense with BMW Group Companies relates to loans with affiliates and derivatives.

Interest income with third parties relates to derivatives and bank deposits. Interest expense with third parties relates to derivatives, interest on debt and commercial paper.

(b) Financial Result

The caption "Financial Result" in the statements of comprehensive income / (loss) includes: the liquidity fee between BMW US Capital and BMW AG, the fee remitted to BMW AG to guarantee the unsecured debt, and foreign exchange gains and losses on operational transactions, stand-alone interest rate derivatives, fair value adjustments of hedged items, debt and other financial instruments. Operational transactions include routine transactions denominated in foreign currencies.

in thousands of dollars	2023	2022
Liquidity fee	96,491	146,949
Gains on stand-alone interest rate derivatives	97,716	32,220
Gains on fair value adjustments from applying hedge accounting	616,907	1,437,647
Foreign exchange gains on term debt	-	94,496
Foreign exchange gains on other financial instruments	22,493	31,620
Total gains	833,607	1,742,932
Guarantee fee	(22,764)	(24,057)
Losses on stand-alone interest rate derivatives	(285,640)	(28,158)
Losses on fair value adjustments from applying hedge accounting	(413,724)	(1,491,808)
Foreign exchange losses on term debt	(19,715)	-
Foreign exchange losses on other financial instruments	(29,196)	(47,258)
Total losses	(771,039)	(1,591,281)
Total	62,568	151,651

(c) Income taxes

The Company's federal and state income tax payments are made by BMW (US) Holding Corp. as part of a consolidated tax return. Included in Payables to BMW Group companies at December 31, 2023 is \$12,344k of current income tax payable. At December 31, 2022 a current income tax payable of \$11,774k is included in Payables from BMW Group companies. The provision for federal, and state income taxes for the periods ended December 31, 2023 and 2022 consists of the following:

in thousands of dollars	2023	2022
Current:		
Federal	(10,583)	(9,318)
State and local	(1,761)	(2,456)
	(12,344)	(11,774)
Deferred:		
Federal	4,301	(2,509)
State and local	1,024	(609)
	5,325	(3,118)
Total income tax expense	(7,019)	(14,892)

The effective tax rate for the years ended December 31, 2023 and 2022 was 22.91% and 25.08%, respectively. The deferred tax benefit from OCI amounts \$234k in 2023.

The components of deferred taxes for the years ended December 31, 2023 and 2022 are as follows:

in thousands of dollars	2023	2022
Deferred tax assets:		
Accrued employee bonus	117	106
Pension	14	13
Deferred income	5,468	4,460
Credit reserve	744	680
Derivative instruments	5,835	1,360
Total deferred tax assets	12,178	6,619

The following table presents a reconciliation between the reported income taxes and the income taxes which would be computed by applying the normal federal tax rate to income before taxes:

in thousands of dollars	2023	2022
Net (loss) before provision for income taxes	30,644	59,378
Applicable statutory federal income tax rate	21%	21%
Computed federal income tax	(6,436)	(12,470)
State income tax	(635)	(2,350)
Others	(1)	(1)
Effect of tax rate change	53	(71)
Total income tax expense	(7,019)	(14,892)

16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

The Company measures the fair value of the financial instruments based on the fair value hierarchy that reflects the significance of the inputs used in making the measurement:

Level 1: Level 1 inputs are quoted market prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date.

Level 2: Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of financial instruments in Level 2 are based on valuation techniques using observable inputs, either directly (i. e., as prices) or indirectly (i. e., derived from prices) at the measurement date.

Level 3: Level 3 inputs are unobservable inputs for the asset or liability. The fair value of financial instruments in Level 3 are based on valuation techniques using significant unobservable inputs.

The Company generally uses the discounted cash flow model as the valuation technique to determine the fair value of financial instruments at the measurement date. The objective of the valuation technique is to arrive at a fair value measurement that reflects the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Essential observable inputs used in this valuation technique include observable current market variables, such as interest rates, credit risk and foreign exchange rates.

Derivatives are classified in Level 2 of the fair value hierarchy using the discounted cash flow model to determine the fair value using yield curves of the cash flow currency and relevant credit spreads.

For non-current non-derivative financial assets and liabilities (such as receivables / liabilities from BMW Group companies and term debt) the fair value, which is determined for disclosure purposes, is measured by discounting the future principal and interest cash flows using a market rate of interest for similar risk and matching maturity as well as relevant credit

spreads at the reporting date. Therefore these fair values are allocated as Level 2.

For reasons of materiality, the fair value of current non-derivative financial assets and liabilities is generally deemed to be approximated by the carrying amount.

For the periods ended December 31, 2023 and 2022, the fair value of the financial instruments has been measured by using either Level 1 or Level 2 inputs.

The transfers between the level of the fair value hierarchy are reported at the respective reporting dates. There have been no transfers between the levels during the reporting period.

The following table shows net gains and losses by category:

in thousands of dollars	2023	2022
Financial instruments measured at fair value through profit or loss	184,820	770,350
Financial assets measured at amortized cost	1,113,700	497,468
Financial liabilities measured at amortized cost	(1,140,366)	(698,958)

*Prior year figures adjusted.

Net gains and losses from financial instruments at fair value through profit or loss are composed of derivative financial instruments not included in a hedging relationship.

Financial assets and liabilities measured at amortized cost are subject to changes in fair value that are recognized through profit or loss due to designated hedging relationships. These changes in fair value are largely neutralized by the offsetting changes in fair value arising on hedging transactions and for this reason are not recognized in net gains and losses. Net gains and losses from financial assets at amortized cost include interest income

as well as impairment losses. Financial liabilities at amortized cost only include interest expense.

The below table represents the offsetting of financial instruments, which have the following impact on the carrying amounts of derivatives:

in thousands of dollars	2023		2022	
	Reported on assets side	Reported on liabilities side	Reported on assets side	Reported on liabilities side
Balance sheet amounts as reported	295,403	1,023,701	638,527	1,274,844
Gross amount of derivatives which can be offset in case of insolvency	(178,037)	(178,037)	(303,705)	(303,705)
Net amount after offsetting	117,366	845,664	334,822	971,139

6 Related Parties

In accordance with IAS 24 (Related Party Disclosures), related individuals or entities, which have the ability to control the Company or which are controlled by the Company, must be disclosed unless such parties are already included in the financial statements as affiliated companies. Control is defined as ownership of more than one half of the voting power of the Company or the power to direct, by statute or agreement, the financial and operating policies of the management of the Company.

The disclosure requirements of IAS 24 also cover transactions with associates, joint ventures, and individuals that have the ability to exercise significant influence over the financial and operating policies of the Company.

In addition, the requirements contained in IAS 24 relating to key management personnel and close members of their families or intermediary entities are also applied.

BMW AG guarantees the unsecured debt of the Company, for this the Company remits a fee to BMW AG. The guarantee fee of 12.5bps is defined

based upon a transfer pricing policy and arm's length principle defined by BMW AG and it is remitted from the Company to BMW AG on a monthly basis. For the periods ended December 31, 2023 and 2022 the amount paid for this guarantee was \$22,764k and \$24,057k respectively.

The Company provides a factoring service of short-term inter-group BMW AG trade receivables. For this service the Company earns a commission equal to 0.05% of the receivables. The Company also earns interest which is equal to the designed benchmark rate for maturities between 30 and 90 days plus a defined margin. The defined margin is set by the Company monthly and is communicated to seller at the beginning of each month.

The Company earns interest on loans granted to affiliates and pays interest on loans received from affiliates. The interest rate is defined according to the BMW Group pricing policies and based upon the Arm's length principle plus a defined margin which is derived from BMW Group borrowing costs and service fees. For the periods ended December 31, 2023 and 2022 the Company received interest in the amounts of \$1,267,654k, and \$538,488k. For the same periods, the Company paid interest in the amounts of \$647,503k, and \$181,411k respectively.

For the periods ended December 31, 2023 and 2022 the Company received a liquidity fee from BMW AG related to its business model of \$96,491k, and \$146,949k respectively. The liquidity fee is to mitigate volatility that arises from asset/liability maturity mismatches and to keep the Company's return on assets (RoA) at arm's length principle.

For the periods ended December 31, 2023 and December 31, 2022, the disclosure requirements of IAS 24 only affect the Company with regard to relationships with the Parent, affiliated entities, and members of management and officers.

The related party balances for the years periods ended December 31, 2023 and December 31, 2022 were as follows:

Short-term employee benefits	1,440	1,447
Post-employment benefits	61	42
Total	1,501	1,489

Risk Management

The exposure of the Company can be broken down into two main categories: financial and nonfinancial risks.

(i) Financial Risks

The formal procedures and policies operated by the Company to cover bank, credit, interest rate, foreign exchange, and other treasury matters are consistent with objectives and policies for the financial risk management within BMW AG. The Company's policy is not to take positions in derivative financial instruments with the aim of profit realization. On a daily basis, the Company measures the risk of outstanding positions, which are managed within the established limits in compliance with the BMW AG policies. Financial risks arise mainly from credit, liquidity and market risks including currency and interest rate risks.

(a) Credit Risk

The Company is exposed to credit risk because of its group external business operation and financing activities within the BMW Group. Credit risk is the risk of financial loss to the Company if any counterparty fails to meet its contractual obligations associated with a financial instrument. This risk is partly mitigated by entering into financial instruments only with parties, which have the investment grade credit standing. Further, the Company participates in a comprehensive limit system that assesses and limits the credit exposure to any single external counterparty on an ongoing basis. The Company continually monitors its position to ensure that it stays within the credit exposure limits set by BMW AG.

The maximum credit risk is reflected by the carrying amount of the financial assets recognized in the balance sheet. Expected Credit Losses (ECL) according to IFRS 9 are determined using the general approach for receivables from BMW Group companies based on historical credit loss experience, adjusted for factors that are specific to the debtors as well as general

economic conditions. Due to the structure of the debtors encompassing mostly BMW Group companies the credit risk is deemed to be low. Therefore, the company does not hold any material collaterals or other credit enhancements. Other than the credit risk exposure resulting from the BMW Group companies, there are no material concentrations of credit risk in the Company. The amounts in the below table have an S&P credit rating of A.

The Company recognized the following loss allowance for receivables from BMW Group companies as of December 31, 2023 and 2022, respectively:

2023 in thousands of dollars	Stage 1 12 month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL (credit-impaired)
Cash and cash equivalents	538,232		
Receivables from BMW Group companies			
Gross carrying amounts	30,988,881	-	-
Recognized loss allowances	(3,037)	-	-
Total	31,524,076	-	-

2022 in thousands of dollars	Stage 1 12 month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL (credit-impaired)
Cash and cash equivalents	80,847		
Receivables from BMW Group companies			
Gross carrying amounts	28,599,934	-	-
Recognized loss allowances	(2,802)	-	-
Total	28,677,979	-	-

Considering the stable portfolio of the receivables from BMW Group companies and the mostly unchanged circumstances regarding the inputs, assumptions and estimation techniques for calculating the expected credit losses, no material changes in the recognized loss allowance were determined as of December 31, 2023. Due to the change in balances of the Group receivables the expected credit loss increased year-over-year by \$235k to \$(3,037)k.

(b) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations as they come due. With its access to the BMW AG Euro Medium Term Note Program, as well as its commercial paper program and short term deposits, the Company has ample resources to mitigate this risk. The Company believes it has a comprehensive funding strategy that incorporates a diverse set of funding options.

(c) Market Risk

Market risk is the risk from changes in market prices, such as foreign exchange rates, interest rates, and credit spreads, which will affect the Company's income or the value of its holdings of the financial instruments. The objective of market risk management is to manage and control market risk exposure within acceptable limits.

Increases in credit spreads could arise from changes in demand for term debt instruments in capital markets, the removal of the unconditional and irrevocable guarantees of BMW AG for the debt issuance programs in which the Company participates, a weakening credit profile of the BMW Group, and a decreasing willingness of banks to provide credit lines and loans. This risk is managed centrally within the BMW Group with a wide range of organizational components to identify and mitigate such events.

Currency Risk

Currency risk refers to the potential changes of value or cash flows in financial assets and liabilities including derivatives in response to fluctuations in exchange rates. The Company manages this risk for its affiliates by entering into forward, swap and option contracts denominated in foreign currencies with third parties, which are used to hedge certain operating cycle commitments in accordance with the cash flow exposure strategy managed by BMW AG. Simultaneously, the Company enters into reciprocal contracts with affiliates. Therefore, no material net gain or loss is realized by the Company. In addition, the Company utilizes foreign exchange rate derivatives to hedge foreign exchange rate exposures arising from foreign currency loans.

At December 31, 2023 and, 2022, the Company had foreign currency forward and swap contracts with external parties to buy and /or sell foreign currencies with notional amounts totaling approximately \$158,581k and \$240,000k, respectively. The fair value of these contracts at December 31, 2023 and December 31, 2022 was \$3,650k and \$479k, respectively. The currency exposure at December 31, 2023 and, 2022 is detailed below. Hedge Accounting is not applied to account for these economic hedge relationships at December 31, 2023 and, 2022.

2023 in thousands (all currencies)	Non-derivative financial assets	Non-derivative financial liabilities	Derivative financial instruments
CAD	869,715	(275,042)	(320,000)
MXN	192,231	(280,448)	-
EUR	-	(500,000)	500,000

2022 in thousands (all currencies)	Non-derivative financial assets	Non-derivative financial liabilities	Derivative financial instruments
CAD	370,168	(210,522)	(370,000)
MXN	18,786	(1,340)	-
EUR	-	(501,865)	500,000

3	Management Report
8	Responsibility Statement
10	Independent Auditor's Report
16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

The sensitivity of the Company's results to changes in foreign currencies against the functional currency shows:

2023 Currency	Effects on result of a 10% rise in the USD against the respective currency (in thousands dollars)	Effects on result of a 10% decrease in the USD against the respective currency (in thousands dollars)
CAD	(18,850)	23,039
MXN	473	(578)
EUR	-	-

2022 Currency	Effects on result of a 10% rise in the USD against the respective currency (in thousands dollars)	Effects on result of a 10% decrease in the USD against the respective currency (in thousands dollars)
CAD	14,120	(17,258)
MXN	(81)	99
EUR	159	(194)

The sensitivity analysis assumes that all other variables, in particular interest rates, remain the same. A concentration of currency risk has not been identified.

Interest Rate Risk

Interest rate risk refers to potential changes of value in non-derivative financial assets and liabilities including derivatives in response to fluctuations in interest rates. The Company holds a substantial volume of interest rate sensitive non-derivative financial assets and liabilities for operational and financial activities. Changes in interest rates can have adverse effects on the

financial position and operating result of the Company. In order to mitigate the impact of interest rate risk, the Company aims in general to change interest rates from fixed to floating. Furthermore, interest rate risk is managed through economic hedges, using derivative financial instruments. To manage the maturity gaps, appropriate interest rate derivatives are used.

As a result of the ongoing reform and replacement of specific benchmark interest rates, uncertainty remains regarding the timing and exact nature of those changes. Overall, a considerable number of contracts within the Company are directly affected by the reform of benchmark interest rates. Hedging relationships within the Company are based primarily on USD LIBOR reference interest rates, whereby those rates are designated as the hedged risk in fair value hedges. In the case of these hedging relationships, uncertainty arises with respect to the identifiability of the designated benchmark interest rates. For instruments maturing after the cessation of USD LIBOR, the notional amount of non-derivative financial liabilities not yet converted to an alternative interest rate at December 31, 2022, is \$50,000k. For all financial derivatives referencing USD Libor existing as of the reporting date 2022, an arrangement for the time of the cessation of the interest rate has already been made with the counterparty. In the financial year 2023, all contracts based on USD LIBOR were converted to alternative benchmark interest rates.

All interest rate derivative instruments not formally designated as hedging instruments in hedging relationships are recorded at fair value with the changes in fair value recognized in the financial result on the statements of comprehensive income or loss. The fair value of these interest rate derivative positions are reflected as of December 31, 2023 and, 2022 in interest rate derivative assets in the amount of \$90,498k and \$69,007k, respectively, and interest rate derivative liabilities in the amount of \$97,882k and \$56,301k, respectively. The realized and unrealized loss on stand-alone interest rate derivatives was \$187,924k in 2023 and gain of \$4,062k in 2022.

16	Statements of Financial Position
17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

For those hedging relationships for which fair value hedge accounting is applied according to IFRS 9, the fixed rate debt designated as hedged item are accounted for as an amount equal to the amortized cost and an amount representing the change in fair value of the interest rate risk being hedged (basis adjustment). Changes in the fair value of interest rate swap contracts and the offsetting changes in the adjusted carrying value of the related portion of the fixed rate debt being hedged are recognized in the statement of comprehensive income or loss. The ineffective portion of a fair value hedge is recognized immediately in profit or loss.

The nominal amounts of hedging instruments at December 31, 2023 and 2022 were as follows:

2023 in thousands of dollars	Maturity within one year	Maturity between one and five years	Maturity later than five years
Nominal amounts of hedging instruments			
Interest rate swaps	9,450,000	15,050,000	3,820,000
Combined interest / currency swaps	-	553,750	-

2022 in thousands of dollars	Maturity within one year	Maturity between one and five years	Maturity later than five years
Nominal amounts of hedging instruments			
Interest rate swaps	10,800,000	16,455,000	4,470,000
Combined interest / currency swaps	-	533,700	-

The following table provides information on the nominal amounts, carrying amounts and fair value changes of derivative financial instruments designated as hedging instruments:

2023 in thousands of dollars	Carrying amounts / Fair values			
	Nominal amounts	Derivative assets	Derivative liabilities	Change in fair value of designated components in reporting period for determining ineffective- ness
Fair value hedges				
Interest rate risks	28,320,000	204,905	895,884	97,676
Combined interest rate / currency risk	553,750	-	26,285	22,061

2022 in thousands of dollars	Carrying amounts / Fair values			
	Nominal amounts	Derivative assets	Derivative liabilities	Change in fair value of designated components in reporting period for determining ineffective- ness
Fair value hedges				
Interest rate risks	31,725,000	569,520	1,151,946	(813,783)
Combined interest rate / currency risk	533,700	-	66,597	(70,151)

17	Statements of Comprehensive Income
18	Statements of Changes in Member's Capital
19	Statements of Cash Flows
20	Notes to Financial Statements

The cost of hedging reserve, showing the not designated components, has developed as follows:

	2023	2022
in thousands of dollars	Cost of hedging	Cost of hedging
Balance at January 1	1,984	3,671
Reclassification to profit or loss	912	(2,241)
Deferred taxes	(230)	554
Balance at December 31	2,666	1,984

The fair value of the Company's interest rate portfolio, which represents the net present value of all future, fixed cash flows, including loans, deposits, and derivative financial instruments, was \$(597,838)k as of December 31, 2023 and \$68,090k as of December 31, 2022. A one basis point movement in interest rates would have increased or decreased this valuation at December 31, 2023 by \$26k and by \$57k at December 31, 2022.

The Company assesses its interest rate exposure by using a value at risk analysis. This is based on a historical simulation, in which the potential future fair value losses of the interest rate portfolio are compared with expected amounts on the basis of a holding period of 250 days and a confidence level of 99.98%. For year ended December 31, 2023 and 2022, the potential volume of fair value fluctuations measured on the basis of the value at risk approach was \$50,917k and \$37,106k, respectively.

(ii) Nonfinancial Risks

Nonfinancial risks could arise from the Company's operations. Operational risks mainly result from the use of computer systems and information technology. The Company uses computer systems to monitor financial positions and daily cash flows and process payments to internal and external counterparties. System failures can result in delays in payment processing. Further operational risk can arise from the settlement of financial transactions.

The management of daily cash flows at the Company depends on the timely receipt of funds from external institutions who act as counterparties of financial transactions, such as bonds, swaps, or other derivative financial instruments. To mitigate negative impacts of system failures, all key systems are set up in parallel and/or have backup facilities.

(a) Capital Management

The Company's objectives, when managing capital at an individual company level, are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may issue new shares or adjust the amount of dividends paid to shareholders. The Company has no prescribed dividend policy.

The Company's equity, as disclosed on the face of the statement of financial position, constitutes its capital. The Company maintains its level of capital by reference to its financial obligations and commitments arising from operations requirements. In view of the extent of the Company's borrowings or debt, the capital level as at the end of the reporting period is deemed adequate by the board of management of the Company.

There were no changes in the Company's approach to capital management during the first half of the year. The Company is not subject to externally imposed capital requirements.

(b) Concentration of Risk

No concentration of risk was identified that would be relevant to financial statement readers.

7 Cash Flow

The statements of cash flows show how the cash and cash equivalents of the Company have changed during the year as a result of cash inflows and cash outflows. In accordance with IAS 7, cash flows are classified into cash flows from operating, investing and financing activities. The Company's purpose is to assist the financing of the activities conducted by companies of the BMW Group. The cash flows from operating activities are presented

under the indirect method (profit or loss for the period reconciled to the total net cash flow from operating activities). Under this method, changes in assets and liabilities relating to operating activities are adjusted for currency translation effects. The cash flows from investing and financing activities are based on actual payments and receipts.

Liabilities related to financing activities can be reconciled as follows:

in thousands of dollars	2022	Cash flows	Accrued interest	Foreign exchange	Fair value adjustments	Fee amortization	2023
Term debt	16,991,817	(123,783)	34,200	19,715	385,622	(2,668)	17,304,903

	17,566,542	1,503,308	37,929	19,715	385,622	(2,668)	19,510,448

9 Segment Information

According to the definition of an operating segment under IFRS 8 and as presented in [Note \(1\)](#) Nature of Operations, BMW US Capital, LLC has one segment, and figures included in the statements of comprehensive income / (loss) represent the nature and financial effects of the business activities. Regarding the major customers and the geographical areas we refer to [Note \(1\)](#).

9 Additional Disclosures

During 2023, no events have occurred, that could be considered unusual due to their nature, size or incidence, that have not been disclosed in previous notes and that could have a major impact on the earnings performance, financial position and net assets of the Company. There have been no changes in the composition of the Company during 2023. The Company did not become an investment entity under the definition of IFRS 10.

10 Contingent Liabilities

As of December 31, 2023, the Company confirms that there are no contingent liabilities requiring disclosure in the financial statements. The Company diligently reviewed all relevant records, contracts, and guarantees, ensuring compliance with accounting standards. While the Company remains committed to transparency, it is possible that future events may give rise to contingent liabilities. The company will continue to remain vigilant in monitoring and assessing any potential contingencies that may arise.

11 Subsequent Events

The Company has evaluated subsequent events for potential recognition, measurement, or disclosure in the financial statements occurring after the reported period through the date of this report April 26, 2024 and concluded no such events occurred.
