

INFORMATION ON ACCESSIBILITY OF ONLINE SERVICES.

We want the online service to be accessible to all shareholders. Therefore, we design our application so that as many people as possible can use it easily and intuitively.

In doing so, we take into account the requirements of the German Federal Act on Strengthening Accessibility (Barrierefreiheitsstärkungsgesetz - BFSG) and the specifications of the AA standard of the Web Content Accessibility Guidelines (WCAG).

To continue addressing the issues of perceivability, operability, understandability, and robustness, we are continuously developing our digital services for shareholders.

Please report any accessibility barriers you may encounter:
